SMOOTHNESS
and ENDURANCE
never before known at the price

WITH its sound basic design and its background of scientific development on General Motors Proving Ground—with its production advantages provided by the vast facilities of General Motors with its score of engineering advancements, including the famous G-M-R cylinder head—

—Pontiac Six offers a combination of smooth six-cylinder performance and high-speed endurance, the equal of which is found in no other car in the world selling for so low a price.

Its smooth, silent performance, combined with the beauty and luxury of its Fisher bodies, provides a measure of owner satisfaction unequalled in its field. And its tremendous endurance results in unparalleled length of life, which in turn, is expressed in consistently high resale value.

More important reasons for the selection of any car have never been found. That's why ever-increasing thousands are choosing the Pontiac Six . . . why Pontiac sales for 1928 are far ahead of previous records.

Clarence Gripp Drown-
ed While Bathing In
Red Deer River

Tragic End To Berry Picking Party

Clarence Hans Gripp, son of Mr. and Mrs. John Gripp of Oyen, lost his life last Sunday afternoon, while bathing in the Red Deer river near Empress, the fatality occurring about 6 o'clock p.m. near the site of the old ferry.

A party of three car loads, including Mr. and Mrs. John Gripp, Helen, Leonard and Leona Gripp, Olive Sullivan, Leo Stagg and Mike Porembuk of Oyen, Mr. and Mrs. Pete Peterson, Clarence Peterson, Lillian and Louis Hohen of Chinook, Mr. Stan Thompkins of Empress and the deceased, arrived spending the afternoon picking choke cherries, decided to go in bathing. Of those who went in to bathe, some were already out of the water dressing when the fatality occurred.

Apparently partially exhausted by his efforts swimming and finding himself in difficulties, Clarence signalled to his companions for aid. One companion, telling him to hang on to his bathing suit, was making progress towing him into his depths when Clarence let go and grabbed another companion. Both sank and Clarence did not come up again. Frantic efforts were made to locate him but without avail. Meanwhile Constable Wallace of the A.R.C. stationed at Empress, arrived on the scene and assisted in the search. Donning a bathing suit, Constable Wallace was untiring in his efforts to locate the body by frequently diving, but without success.

Residents of Empress kept swelling the band of searchers, who were now using a boat and drags, but it was not until two hours after the tragedy occurred that the body was recovered.

Service was held at the home of Mr. and Mrs. Gripp at 2 o'clock on Monday afternoon. This was followed by a funeral service in Oyen at 5 p.m. Interment was carried out at Oyen cemetery. Rev. H. C. Woods, of Oyen United Church officiating.

The late Clarence Hans Gripp was born, August 26, 1902.

CARD OF THANKS

Mr. and Mrs. John Gripp desire to express the appreciation of the family for the help and assistance given during their terrible hours of suspense and later for the kindness extended to them in their sad bereavement.

Hail Plays Havoc In Vicinity
of Sounding Creek

A hailstorm of considerable violence swept through the district adjoining Sounding Creek last Saturday evening. The reported damage to crops varies from 40 per cent to total loss. Robert Gardiner, M.P., who had one of the finest crops he had ever grown, was among those who suffered total loss. Lou and Jack Walper, Alf Cooper, McFarland, Elmer MacArthur and Tom Barker also had 100 per cent losses. Howard Cates and Duncan Cunningham were hit about 80 per cent.

Some damage to crops southeast of Benton was also reported.

M. D. Golden Centre

The fifth meeting of council of the M. D. Golden Centre, No. 272, was held at the N.E. 13 30 5, on Saturday, August 11. Members all present.

Council called to order by Rose and business transacted as follows: Minutes read and confirmed. Correspondence read and disposed of. Financial statement to July 30, was read and accepted.

The following accounts were paid: Curt Hanstein, building bridge in ward 6, \$30.00; Chapin-Slosser Agency, premium on Walper bond, \$400; Richardson Road Machinery, machinery \$32.25; Alberta Wood Preserving Co., \$200.00; Central Alberta Sanatorium, re W. J. Evans, 46.50; Hans Brekke, blacksmithing, 13.85; Western Municipal News, supplies, 22.00; Mrs. Michaels, rent, 6.00; A. Jorgeson express on repairs, .50; Fee and mileage, meetings, R. Cates, 18.00; B. Morris, 18.00; P. C. Hoard, 21.00; Ed. Stewart, 25.80; John Dahl, 18.00; and A. Jorgeson, 15.00; Ralph Greene, office expense, 20.00; telephone tolls, 7.10; bailiff fees, 10.50.

It was decided to continue 1927 policy, re collection of arrears of taxes and seed grain and relief loans.

Council adjourned to meet on Wednesday, October 3, at N.E. 13 30 5, at 9 o'clock a.m.

Canada To The Fore

The breaking of records by Canada is becoming a commonplace. It is indeed an oft year when, in some branch of human activity and endeavor, this young Dominion does not attract world attention to itself by some new and startling achievement.

Prior to the war, Canada was hardly known, even as a name, to the vast majority of the peoples of Europe, and those who recognized the name had but slight knowledge of the country. To most of the world, Canada was one of the colonies which Britain had scattered here and there over the face of the globe, but which was of little value and of still less importance in world affairs.

In the war Canada made a name for itself, and other nations were suddenly made to realize that there had arisen in the western hemisphere a nation which already was helping to write history in large and impressive characters and was destined to have a profound effect upon international relations, political and economic. Canada's war effort served, perhaps as nothing of a less spectacular nature could have done, to draw the attention of the people of the United States northward, and awaken them to the fact that the whole of North America was not to be found within the confines of the republic; that, on the contrary, a second American power was rapidly developing at their very doors.

Since the war the reality of this fact has been emphasized. Long the world's greatest exporter of wheat, the United States has seen Canada pass it and secure that title by a wide margin. Within the past year or two, the United States has been forced to also relinquish to Canada the distinction of being the world's largest manufacturer of paper. Steadily, year by year, Canada has been passing other nations in the production of gold and is now within measurable distance of overtaking the United States and assuming second place to South Africa.

Contributing a volume of only minor importance to the total trade and commerce of the world, Canada, a generation ago, Canada was one of the world's greatest traders, a factor to be reckoned with in all the markets of the world. Before the war, dependent upon the money markets of Great Britain and the United States to finance its many undertakings, Canadians today are able not only to finance their own country but to even increase their extent are financing huge undertakings in other countries, while at the same time rapidly paying back into full Canadian credit many large corporations of this country which in years of our financial immaturity were financed and controlled by British and United States capitalists.

The war, and Canada's significant participation therein, also had the effect of raising the international status of the Dominion, giving it not only a status of equality with Great Britain within the Empire, but the rank of a nation in the council of nations. The refusal of the United States to join the League of Nations undoubtedly had the effect of the more directly focusing attention upon the North American nation which did join, and placing Canada in the forefront in the League membership.

And since destiny thus called upon Canada to play its part in the international arena, this responsibility with dignity and real effectiveness. Its place around the council board at Geneva has been no minor or insignificant one. Rather, Canada has wielded an influence power and out of proportion to its present population, but in keeping with the growing importance which other nations now attach to this Dominion.

Having thus moved out into the great international arena, Canada this year decided to be worthily represented at the Olympiad, the great meeting place of the athletes of the world. Despite its small and widely scattered population, this young Dominion dared to try conclusions with the much more numerous representatives of other countries in the field of sport and athletic skill and endurance. And again Canada surprised the world. The sons and daughters of the Dominion, the flag of Canada to victory, time and time again, winning many of the premier events. A Canadian school boy, Percy Williams, of Vancouver, achieved the double victory of winning the 100 metres and the 200 metres races, regarded as classics of the sport. And again Canada triumphed, for the flag of Canada to victory, time and time again, winning many of the premier events. A Canadian school boy, Percy Williams, of Vancouver, achieved the double victory of winning the 100 metres and the 200 metres races, regarded as classics of the sport. And again Canada triumphed, for the flag of Canada to victory, time and time again, winning many of the premier events.

In doing so established a new world's record. A quartette of Toronto girls also broke the world's record in winning the 400 metres relay race. Considering the number of events which the Canadians participated, no other country in the world approached their record.

Canada's future is assured when it can produce virile and courageous young men and women of the stamp of its representatives in the Olympic games, and in the hands of such youth its position as a great agricultural, mining and manufacturing country, as a leader in world finance, and as an arbiter in international relations, is assured. Canada is coming into that proud position which Nature through her bountiful endowments intended it should occupy, and if the Canadian people continue to regard each new achievement as an incentive to still greater effort and enterprise, another generation will see their Dominion occupying a world position second to none.

National Radio Chain

Broadcasting Companies To Improve Quality Of Radio Programs

A national chain broadcast organization, divided into two sections, will commence operation about September 1, it was announced today by R. W. Aschcroft, who has been appointed manager of the new four-network Trans-Canada Broadcast Company.

Mr. Aschcroft said the organization of the company was the outcome of a suggestion by P. J. A. Gaudet, minister of marine and fisheries, that an effort be made by Canadian broadcasting companies to improve the quality of domestic radio programs.

Key stations of the new organization will be located in Winnipeg and Toronto.

Stations in Montreal, Ottawa, Kingston, Hamilton, London and Quebec will be linked up with the eastern section and stations in Saskatoon, Regina, Edmonton, Lethbridge and Vancouver with the western section.

Foreign Minister Of Soviet Republic Refers To Failure Of U.S. To Aid Russia To Sign George Tchitcherine, foreign minister of the Soviet Republic, issued a lengthy statement to the newspapers at the necessity of the Soviet being one of the original participants in Secretary of State Kellogg's anti-war treaty.

Tchitcherine said the United States failure to invite the Soviet to sign the pact indicates "a desire to make the pact an instrument of isolation and struggle against the Soviet."

The statement asserted that the pact was incapable of preventing war "because it does not provide for obligatory disarmament."

Charity covers a multitude of sins that should be allowed to remain uncovered.

Will Need Trained Voices

Talking Movies Will Have To Be Pleasing To Audience

The "talking movie" is just now being much talked about. Producers think it will greatly increase attendance on the pictures. That may be so. But it won't unless movie actors and actresses learn to speak as well as to "register emotion."

A voice has as much personality as a face, perhaps more. As long as it is not allowed to interfere with the face, all goes well; but when the face on the screen is fascinating, and the voice un cultivated and feeble, the contrast makes the audience either uncomfortable or amused. Neither state of mind is good for the box office.

Imperial Oil Development

Spending Million Dollars In Improvements To Regina Plant

When two new storage tanks to be built by the Imperial Oil Company for the plant at Regina are completed, the company will have spent something very close to \$1,000,000 in improvements within 12 months.

Last year the company spent \$750,000 in plant equipment. This year a road oil making plant has just been completed at a cost of \$80,000. The two new storage tanks, both of them 120 feet high, every way by 42 feet high, will cost something like \$150,000.

GIRLS AND WOMEN

NEED RICH BLOOD

This Lady Found Dr. Williams' Pink Pills A Friend Indeed

Because she is a woman there are times when every woman needs help and strength in the form of a blood-building tonic. To thousands of girls and women Dr. Williams' Pink Pills are proving a blessing because they enrich the blood, give strength and energy to the aching nerves. The anemic girl who is languid and pale; the wife whose back feels like breaking; the mother whose health fails as she reaches middle age—all such sufferers Dr. Williams' Pink Pills are invaluable because they build up the blood and improve the circulation of the blood, and thus the health of the body.

At various stages of life Mrs. O. Lake, Walton, N.B., has proved the value of Dr. Williams' Pink Pills. She says: "I have used these pills when a young girl for it is during the teen age when nature calls upon every bit of the reserve strength we have, that we need their rejuvenating help. It was then I found Dr. Williams' Pink Pills a friend indeed. And again now that the girlhood stage is past and I am a mother of four children, subject to all the cares and worries of the home, Dr. Williams' Pink Pills is the only tonic I take to keep up my health and strength, and they have never failed. Should any ailing girl or weary mother, due to my advice try these pills, know they will find them as equally needed as I have."

"You can get these pills from any medicine dealer or by mail at 50 cents a bottle from The Dr. Williams' Medicine Co., Brockville, Ont."

Saskatchewan Wheat Pool The Saskatchewan Wheat Pool report an increase in acreage signed up for the new five year contract period. They report to per cent of the old contract holders signed to date, also a large number of new contracts.

A Remedy For Earache—To have the earache is to endure torture. The ear is a delicate organ and few care to deal with it, considering it work for a doctor. Dr. Thomas' Electric Oil offers a simple remedy. A few drops upon a piece of lint or medicated cotton and placed in the ear will do much in relieving pain.

First Maid: Your fiancée stutters quite a bit, doesn't he? Second Maid: Yes, but it doesn't matter. After we are married he won't have a thing to say, anyway.

HELPED DURING MIDDLE AGE

Woman Praises Lydia E. Pinkham's Vegetable Compound

Sarsia, Ont.—"I am willing to answer letters from other women, to tell them the wonderful good Lydia E. Pinkham's Vegetable Compound has done for me. I cannot be thankful enough for the benefits I received from it. I have had the change of life, I am better, and my troubles made me up to work. A friend advised me to try the Vegetable Compound. I felt great relief at once, began to gain my appetite, and I never got better. I will recommend your medicine to all with trouble like I had."—Mrs. Joseph Sarsia, 162 N. Christina St., Sarsia, Ontario.

A lease for grazing purposes of 51,687 acres of land northwest of the South Saskatchewan river, has been granted to the Atomic Energy Canada Ltd., of Bow Island, Alta.

Groundhogs are perhaps the oddest known type of dog. Stone carving dating back to about 400 B.C. shows figures of these graceful animals.

It's more than a problem in geometry to square the eternal triangle.

When a small boy isn't doing anything else he eats something.

Would Reclaim Sahara Desert

Plan To Create Inland Sea In North Africa

A plan to change the climate of Northern Africa by creating inland seas in the Sahara Desert is being seriously considered by the French government and the cabinet is expected to make a decision on the question in September.

Douglas Hiram, of New York, is the engineer who presented the plan and undertook to raise \$500,000 to further the project. He made an engineering study last spring of the arid wastes lying between the level of the Mediterranean and extending from the Gulf of Gabes westward to Biskra, and formulated plans to cut three ship canals forty feet deep and two hundred feet wide connecting the Mediterranean Sea at Gabes with three dry saline lakes here called "Sahels".

It is estimated that Mediterranean waters by means of these canals would permanently flood some 15,000 square miles reaching from Gabes eastward. This would mean a water route of some 450 miles, connecting ships through a part of the sea deep into Algeria.

The main purpose, however, is to affect climatic conditions by the means of the canal, which Hiram unhesitatingly demonstrates, will be the result.

His scheme is based upon that of a commission of French engineers, chief of whom was M. de Lesseps, who in 1882 made a minute survey of the entire region.

Prosperous Toronto

Residents Pay More Income Tax Than Any Other City in Canada

Property must have struck the City of Toronto in a great way last year, for the Queen City paid nearly three millions more in income tax than in the previous year. The greatest increase of any city in the Dominion, not excepting even Montreal, Toronto's treasury was \$1,435,245.

Of the other principal cities in the Dominion, twelve showed an increased income tax and seven a decrease. Some of the increase is due to the efficiency of the department of national revenue, and includes some of the arrears cleared up under threat of prosecution.

Toronto's income tax collections for 1928-29 were \$1,435,245, an advance of \$2,092,217 over the 1927-28 collections of \$1,046,028. Montreal's 1928-29 collection of \$1,190,275 was \$2,732,754 ahead of the 1927-28 figure of \$1,462,279.

Hard To Replace

Communities Should See That Old Industries Are Supported

It takes at least two new industries to replace in employing capacity one that has failed or moved elsewhere. Few new cities start on a large scale. The city that lets a long-established industry die for lack of help that could properly be given cannot ordinarily make up the economic loss at least in the short run by bringing in another industry to take the place of a defunct one. It is an almost literal translation of the old adage about the birds, the hand and the bush.—New York Sun.

Jasper National Park

Jasper Park, which is situated on the Canadian National Railways in the northern part of Alberta, has a total area of 3,360 square miles. A great portion of this huge mountain wilderness is still unexplored. The entire region is rich in historic association.

She: "We've been waiting a long time for that mother mine." He: "Hours, I should imagine." She (triumphantly): "Oh, George!"

Lack of variety in the food is bad for the digestion.

"It is a long time since I saw you last, miss." "Yes, I have been on a voyage round the world!" "So have I. How strange that we did not meet."—Widdowson, Ohio.

W. N. U. 1746

Ancient Chateau Demolished

Ruins of Thousand Year Old Castle in France Are Removed

Neither governmental nor individual funds could be obtained recently to save one of the most interesting monuments in central France—the chateau built by Thibault III, King of Navarre, in 1199 for Queen Blanche.

The ruins of the chateau, located at Poulin, in the Aube Department, consisted of a stone tower with arched windows and a series of fortified walls. With this historical background they could have been transported to any country in Europe of the Americas at little expense. The windows and portals were excellent condition, and there were several interesting inscriptions attesting the age of the edifice.

For several months the government waited for collectors to enter their bids for the premises, but none appeared on the scene. This caused considerable surprise as in the past the mere location of a thousand-year-old building would have been sufficient to bring collectors and experts from all parts of the world.

The French antiquarians made a final desperate attempt to save the ruins as a part of the nation's architectural patrimony, and the question was even discussed in the Chamber of Deputies.

Needling the French for other purposes, however, the Minister of Education and Fine Arts turned a deaf ear to all such proposals, and is said to have used it through the opening of a public subscription.

One day evening at twilight, the walls and turret which were the last of the chateau of the Hundred Years' War, was sent tumbling to pieces by a tremendous charge of dynamite.

Nothing Pays Better

Education Is Greatest Asset To Success in Life

Does education pay? Surely, there is nothing which pays better. In these days of competition it is the only absolutely indispensable factor, without which success is practically impossible. But, apart from material success, education is the best means of enlightenment to the community as a whole. Ignorance in one form or another is responsible for most of the worst of the world—the war against ignorance begun in schools and carried on through life in the maintenance of civilization. That country is the most civilized which gives its children the best chance of developing their mental and intellectual faculties. Where such development has been adequately provided for, there need be little worry about other things. The schools are the very foundation of society.

The Cost Of Progress

Trees Four Thousand Years Old Are Cut Down To Build Buildings

The giant redwoods of California are being cut down by the lumber companies. The irony of it is that among the redwoods we are cutting down trees that are forty centuries old. In building houses, making railway ties and split into gratings—chiefly gratings. Any fool can make a gratings of "redwood." When a big tree falls with the boom of thunder, every body knows that something lies prostrate that can never be replaced. A second growth may spring from the stump; but humanity is too impatient and avaricious to wait 4,000 years again.—Los Angeles Times.

No Place Like Home

The Invisible Ties That Bind Us To The Home Circle

"The word 'home' is indeed like unto an invisible tie. It is the place where, whose fragrance fills the life. Into it have been gathered our most sacred memories, our tenderest associations, our brightest hopes. It matters little whether the home of one's childhood has been a cottage on the hillside or a house in some city street—round it is woven a romance of interest that grows with the years; to it, from distant places, place of work and thought, friends have trod the path with wistful regret. Alas, alas! Monthly.

Angry Bots—Dae ye hear me? I've a complaint. Postoffice Official—What's your complaint? "The ink in here's as thick that it clogs ma fountain pen."

Mrs. Grogan—It was awful! Twenty-five Bolsheviks and one Irishman killed in the wreck! Mrs. Callahan—Indeed! The poor man!

Canada has the greatest nickel deposits in the world.

Vitamines For Growing Chicks

Cod Liver Oil Is Recommended For Leg Weakness

Leg weakness has been a common disease of young chicks, but investigation of recent years has brought to light a simple remedy, and it is now possible to avoid this trouble.

If growing chicks get an abundance of direct sunlight they are not liable to contract this disease, but if housed for four or more weeks they are invariably subject to the trouble. Feeds that are known to be rich in vitamins, cod liver oil is now used in many poultry flocks and its virtue is believed to be due to its richness in vitamins. A pamphlet on the "Artificial Breeding of Chicks" prepared by the Dominion District Poultry Promoter and the Provincial Poultry Superintendent for New Brunswick and distributed by the Director of Agriculture of the Department of Agriculture, at Ottawa, recommends the use of cod liver oil in amounts of one to two per cent of the main ingredient of the degree of confinement.

This is claimed, will prevent or even cure advanced cases of leg weakness. Eggs, yolks, and canned tomatoes are claimed by the authors to have a value in preventing leg weakness.

Other feed rich in vitamins are yellow corn, green feeds, immature cut clover and alfalfa hay. These if used in an otherwise well balanced ration will give the flock the vitamins necessary for their well doing. The plan recommended for mixing the cod liver oil in the dry mash is to first mix the oil with bran until it is evenly saturated and then to mix the bran with the other ingredients of the mash.

It is in time to do the flock for three or four days.

Are Sun's Rays Declining

Scientists Say That Old Sol May Cool Any Day

Jupiter, the largest planet of the sun's family, is shooting enormous volumes of fire and smoke into the French atmosphere. Some of the comets and fire balls that sometimes hit the earth may come from Jupiter.

Modern reflecting telescopes are capable of photographing three billion of the possible thirty billion suns in our universe.

Each of them is larger and brighter than ours. They shed energy until burnt out. It is said that our sun is seriously near the burnt-out stage. Any day it may totter. But since a day in the universe may be a million years, there is nothing to worry about.

Forest Fire Situation Improved

Season Of 1927 Was Unusually Favorable In Regard To Fires

Reports submitted by field officers of the Forest Service Department of the Interior show the season of 1927 to have been unusually favorable in regard to forest fires. Six hundred and sixty-one fires were reported in the United States in Alberta, Saskatchewan, and Manitoba, protected by the Forest Service during the season.

Each of them is larger and brighter than ours. They shed energy until burnt out. It is said that our sun is seriously near the burnt-out stage. Any day it may totter. But since a day in the universe may be a million years, there is nothing to worry about.

John: "I suppose you think I'm a poor idiot?" Moll: (sweetly): "Oh, no; none of us is perfect!"

He: "What are they?" She: "Your feet."

She Stopped a Clock!

no reason at all other than to please a little child, a captain of one of the Canadian Pacific "White Empresses" of the Pacific took time by the forelock and preserved Christmas Day for little Gloria Cosgrave, seven year daughter of Colonel J. H. Cosgrave, D.S.O., Canadian Trade Commissioner to Shanghai. At the age of two she was crossing the Pacific with her parents and it happened that when the International Date Line was reached, the day threatened to be mutually wiped off the calendar was Christmas.

The Captain, however, knowing there was a child aboard ordered the day to be observed and the day was not to be eliminated in its stand. A special tree and Santa Claus was arranged in mid-Pacific for Gloria's benefit.

She is shown here on board the Canadian Pacific Atlantic liner, "Empress of Australia" on her way to England and in the midst of her second circuit of the globe.

Quit From Bridal Costume

Interesting Memoirs Of 1823 Placed On View In Museum

Frugality and sentiment are joined in the story of a silk quilt made of scraps of wedding dresses and placed on view in the Brooklyn Museum as a loan from Mrs. Theresa Hallock Welsh of Manhattan. It dates back to the Queen's wedding of Deborah Cogswell, of New York and Edward Walter, of Philadelphia.

Bridal costumes in the 19th century were commonly regarded as made for a single wearing, disappearing from sight hence, in packing of linens and lavender. On this occasion the mother and aunts of the bride persuaded the owners to surrender the garments in order that they might be converted into a quilt which the bride might cherish as a memento.

Their faith that it would receive her tender care is justified by its present neat, unmarred appearance.

The colors in the quilt include various shades of blue, green, yellow, and white, and a variety of light gray and white to create white shades. A vase of flowers in the central motif. Three quilted borders surround it. The first is a design of grapes and leaves, the second of a floral and feather scrolls and the third is of leaves.

The museum story of the quilt says much careful planning and many days of work must have been given to design and make it, and the bride to think of it as one of her most prized possessions.

Internal Parasites Of Swine

Sanitation Is Of Prime Importance In Dealing With This Pest

Unfitness in pigs is often due to infestation of internal parasites. The latest edition of the "Swine Husbandry in Canada," of the Department of Agriculture, Ottawa, an article has been included from the pen of Dr. J. H. Stevenson of the Ontario Agricultural College, who in his opening sentence says that "a worm-cursed pig is a lost pig."

Parasites in particular are dealt with in his paper and clearly defined treatments are given for each parasite. Infestation is the most important in intestinal parasites which cause about 80 per cent of the loss in infected yards, pens and fields quickly become victims of parasites as well as distributors of parasites.

The extensive use of colony house and fresh ground for yards during the open season of the year is recommended for the keeping of pigs. The medicinal treatment recommended includes the use of such medicines as oil of turpentine, Santonin, Benzine, and Arca, nut, in doses that should be used for pigs of different ages.

German Invents Film Paper

Paper films are the newest German invention. It is asserted they will revolutionize the picture industry.

Berlin engineer announces that after years of tests he has succeeded in manufacturing paper which will not burn, will not be cultivated, is not inflammable and is cheaper than celluloid film. The Scherwin studio says the invention is a complete success.

A TITLED FARMER

Scion Of Noble Family Has Extensive Holdings In Alberta

Count De Topor, English economist and philanthropist, was among the first of the passengers who landed at the port of Vancouver, B. C., in 1901. The count, who also possesses the title of Duke of Ossini, is the son of the late Emperor Franz Josef of Austria. His family has been prominent in Polish and Austrian history for the past 300 years. The count's forebears being Count Maximilian, chancellor of Poland.

"I have no respect for titles," remarked the count, "but family matters make it essential that I should use mine. To my mind, the only thing of any account in the place in this world man creates by his own efforts."

Count De Topor has extensive interests in Canada. Mainly through his efforts the town of Vermilion, Alberta, has now extensive farm lands. He erected 40 houses there for farm workers and had a large plot of waste land turned into a nice park.

Warden sidewalks were replaced with lawns. The farm workers are happy, and they have lived free from his farms. They have made such splendid progress, he said, that some of them are now as much as he was three years, and came to him wanting to buy property.

Count De Topor has extensive interests in the west and around Edmonton, which include nearly 60,000 acres of farm land.

"Farm land is cheaper in the Canadian west than anywhere else in the world," he remarked, "and the west holds a marvelous future for the farmer and the man who is not afraid of a little hard work."

Count De Topor said he avoided anything to do with immigration of agriculturists into his own country, but pointed out that his visit was private, though he was doing his best to further the claims of Canada as the greatest agricultural nation of the world.

In addition to his philanthropic and agricultural interests, he is a doctor and lawyer, though he does not practice.

"I find no time to practice," he said, "but I am ready to come to look after a sick friend who is lying in his bed in London, Paris, or anywhere else, if I shall return to England to my home in Paris, Grand Street, Sussex."

Count De Topor said he avoided anything to do with immigration of agriculturists into his own country, but pointed out that his visit was private, though he was doing his best to further the claims of Canada as the greatest agricultural nation of the world.

Developing Rust Resistant Wheat

Dominion Cerealist Says Goal Will Be Reached Very Soon

Within three years Western Canada should have a rust resistant wheat which will grade as high as the varieties now being grown, according to L. H. Newman, Dominion Cerealist recently.

Mr. Newman is spending a month or more in the west, inspecting the work of the Dominion Rust Research Laboratory, at the Manitoba Agricultural College, and the various Dominion experimental farms in the west. He also visits farms where rust resistant grains are being produced for experimental purposes.

The Ottawa official announced that the work at the research laboratory at Winnipeg would be extended within a year. An expert cytologist, Miss Hellingberg, formerly of Saskatoon, was transferred to Berkeley College, Calif., has been added to the staff, and will assist her new duties next spring.

The appointment, Mr. Newman said, is the first of its kind in Canada, marking a distinct advance in the study of the disease. The work with the practical purpose of agriculture.

Another phase of cereal work which is engaging the attention of the department is the raising and marketing of high grade milling wheat. The work is being carried on at a variety of barley grown in Manitoba, corresponds closely with the favored variety raised by Old Country farmers and is not afraid of a little hard work."

Count De Topor said he avoided anything to do with immigration of agriculturists into his own country, but pointed out that his visit was private, though he was doing his best to further the claims of Canada as the greatest agricultural nation of the world.

For Economical Transportation

Announcing the NEW UTILITY TRUCK
-another Sensational Chevrolet Value
4 Speeds Forward - 4 Wheel Brakes

NOW Chevrolet presents the New Utility Truck—a low-priced haulage unit embodying every feature of advanced engineering developed through years of experience in commercial car-building and proved by exhaustive testing on the General Motors proving ground!

Typical of the progressive design embodied in this sensational new truck are a four-speed forward transmission, powerful non-locking four-wheel brakes, full ball-bearing steering mechanism, front shock absorber springs, air-bound seat cushions and channel front bumper. In addition, it offers all these basic features which have been so largely instrumental in Chevrolet's tremendous success as the world's largest builder of trucks—rugged rear axle with one-piece bant-type housing . . . semi-elliptic springs set parallel to the load . . . completely enclosed valve-in-head motor with air cleaner, oil filter and positive action wane type oil pump . . . thermostatic control of water circulation . . . low loading height . . . generous road clearance and countless other features of comparable importance.

Visit your Chevrolet dealer and get a trial-load demonstration of this remarkable new truck! It has been developed to meet the modern conditions of business transportation and body types are available for every type of business.

About Town and Country

Mr. and Mrs. R. E. Gillespie, who have been spending a vacation in Winnipeg, Man., returned to town last Monday.

Good progress is being made on Mr. J. Skinner's new home which will soon be ready for the plasterers.

Mr. and Mrs. J. B. Lowe and daughter Phyllis, who have been spending a vacation at the coast, returned to Oyen yesterday.

Mr. Russell Johnston of Rose-town, who arrived in Oyen last Monday, is spending a few days in town.

Mr. and Mrs. Arthur Johnson and daughter Dorothy, who have been on a motor trip to Kennedy, Minn., returned to Oyen last Monday.

Mr. and Mrs. John Naismith and daughter Margaret of Coronation, who have been spending a few days in town, are leaving this afternoon to return home.

Mr. and Mrs. Edward F. Peck are visiting at the home of the former's parents.

Mrs. J. McKenzie's many friends will be pleased to learn that she has recovered from the effects of painful injuries received last Thursday, when she was thrown from a horse.

A party of juveniles organized a charivari and paid a visit to the home of Mr. and Mrs. H. R. Chapin last Thursday evening. Judging by the noise, the occasion was a very successful one.

Leonard Gripp broke a bone in his wrist while cranking a car last Monday. The boy was brought to the local hospital for treatment and later returned to his home.

The Oyen ball team journeyed to Hanna last Wednesday to participate in a tournament. They lost to Drumheller in their first game.

Mr. A. J. Kastor, grain buyer at the Pool elevator for the last year, returned last Thursday after spending a vacation. He left with his family last Monday for Viking, Alta., where he will buy for the Pool this season.

Louis Gillespie arrived in town last Monday from Fort William to spend a holiday with his parents.

Miss Vera Johnston and Le-Mar Peterson of Rose-town are spending a few days in town. They motored here from Rose-town with Mr. and Mrs. Arthur Johnson.

Mr. Gordon Caswell moved into the Pool residence last Monday, and will commence duties as grain buyer for the Pool at Oyen as soon as he is checked in. Formerly a resident of Oyen, his return is welcomed by his many friends.
